PROFESSIONAL SUMMARY

Cybersecurity engineer with enterprise experience in endpoint security, incident investigation, log analysis, and technical troubleshooting. Brings hands-on exposure to endpoint and XDR platforms, network diagnostics, and customer-facing case ownership across AMEA. Grounded in Digital Forensics and focused on security operations, cloud, and infrastructure roles.

EXPERIENCE

Trend Micro

Technical Support Engineer, Security

Pasig City, Philippines
Oct 2025 – Aug 2026

- Investigate and resolve **40–50 enterprise security cases monthly** across AMEA, spanning malware triage, log forensics, incident response, and remote troubleshooting for Vision One, Apex One, Apex Central, and WFBS.
- Diagnose agent, sensor, server, and console connectivity issues across on-premise, hybrid, and SaaS environments using Wireshark and Procmon; document root cause and coordinate structured escalations with engineering and product teams.
- Guide enterprise customers on endpoint protection policy configuration and operational best practices to reduce repeat incidents and misconfiguration-related cases.
- Completed Trend Micro's New Engineering Program (NEP), developing foundational knowledge of Windows administration, Active Directory, Group Policy, enterprise networking, firewalls, AWS, and Azure.

Kapiton Solutions Inc.

Full Stack Developer Intern

De La Salle University Manila
Mar 2025 – Jul 2025

- Developed and maintained Laravel backend features in Dockerized environments, supporting reliable feature releases and system maintenance.
- Used GitHub-based collaboration workflows and supported containerized deployment pipelines for consistent releases.

PROJECTS

ClickSmart: AI-Chatbot Supported Cybercrime Awareness Website | Python, TensorFlow, GPT-2, JavaScript, Render

- Fine-tuned a GPT-2 model on Philippine cyber law resources and built a Python/TensorFlow training and inference pipeline for domain-specific, context-aware responses.
- Integrated and deployed the model in a responsive HTML, CSS, and JavaScript web application on Render, providing an accessible cybercrime-awareness platform.

Tienda: E-commerce Web Application | MongoDB, Express.js, React, Node.js, Render

- Built and deployed a full-stack e-commerce application with dynamic product listings, shopping-cart functionality, and a responsive user experience.
- Implemented user authentication and payment-processing workflows, integrating the MERN stack into an end-to-end online shopping platform.

CERTIFICATIONS

ISC2 Certified in Cybersecurity (CC)

Apex One Certified Master & Professional

Apex Central Certified Master

Fundamentals of Malware Analysis

Threat Intelligence Analyst Foundation

Endpoint Security

Intermediate SQL

ISC2 | Aug 2026
Trend Micro | Dec 2025 – Dec 2027
Trend Micro | Feb 2026
Trend Micro | Dec 2025
ArcX | 2026
Cisco | 2026
DataCamp | 2025

TECHNICAL SKILLS

Security & Monitoring: Trend Micro Vision One, Apex One, Apex Central, WFBS; malware investigation; log analysis; alert triage; basic SIEM correlation; Wireshark; Procmon

Networking & Systems: TCP/IP, DNS, DHCP, HTTP/S, VLANs, NAT; Windows, Linux/Unix, Active Directory (AD DS), Group Policy (GPO)

Cloud, Automation & Data: AWS, Azure, Python, PowerShell, Bash, SQL

Tools: Git, GitHub, Jenkins, Grafana, Jira, Visual Studio Code, Docker, D365

EDUCATION

National University Manila

Bachelor of Science in Computer Science, Specialization in Digital Forensics

2021 – 2025
