SKILLS

Security & Support

- Endpoint protection, EDR/XDR
- Log analysis & root-cause analysis
- Windows troubleshooting
- Network troubleshooting
- Digital forensics fundamentals
- Case management

Cloud & DevOps

- Docker, Jenkins, Grafana
- GitHub, CI/CD basics
- Linux
- AWS & IBM Cloud fundamentals

Programming & Data

- Python, Java, PHP/Laravel
- JavaScript (React, Node, Express)
- SQL (MySQL), MongoDB
- HTML/CSS

Soft Skills

- Problem-solving under pressure
- Clear customer communication
- Fast, independent learner

PROFILE

Engineer at Trend Micro, a global cybersecurity company, with a BS in Computer Science specialized in Digital Forensics. Hands-on troubleshooting of enterprise endpoint and cloud security products in Windows environments — log analysis, root-cause investigation, and network diagnostics — backed by full-stack development experience. Building toward security operations (SOC), networking, and cloud roles.

WORK EXPERIENCE

Trend Micro

Oct 2025 – Aug 2026

DevOps Platform Engineer / Technical Support Engineer · Manila

- Managed and resolved multiple platform and security support cases daily for enterprise customers under time-sensitive conditions, maintaining quality and clear communication.
- Performed troubleshooting and root-cause analysis in customer Windows environments using system/application logs, Grafana dashboards, and AI-assisted tools, reducing repeat escalations.
- Diagnosed network-related product issues — agent-to-console connectivity, proxy and firewall configuration, and communication failures — across enterprise deployments.
- Identified security vulnerabilities in customer Windows environments and recommended hardening measures aligned with industry best practices.
- Completed the New Engineering Program (NEP) and owned closed-case quality handling — validating resolutions and documenting root cause for future investigations.

Kapiton Solutions Inc.

Mar 2025 – Jul 2025

Full Stack Developer (Internship) · Manila

- Developed and maintained scalable backend systems with Laravel in Dockerized environments, contributing to feature rollouts and reliability improvements.
- Managed collaborative workflows in GitHub and assisted with containerized deployment pipelines for consistent releases.

PROJECTS

ClickSmart — AI Chatbot for Cybercrime Awareness

2025

- Fine-tuned a GPT-2 model on Philippine cybercrime law (Python, TensorFlow) to power a context-aware legal Q&A chatbot; deployed the awareness site on Render.

Tienda — E-commerce Web Application

2025

- Full-stack MERN platform with secure authentication, payment processing, and dynamic product listings, deployed on Render.

EDUCATION

BS Computer Science, Specialization in Digital Forensics

2021 – 2025

National University – Manila

GWA: 3.25 / 4.0

CERTIFICATIONS

- Intermediate SQL — [issuer, year]
- IBM Cloud Essentials — IBM, [year]
- Getting Started with Data Analytics on AWS — [issuer, year]
